ECOSHOT is a manual chemical dosing system which can dispense various volumes of concentrates into a bottle, a bucket or a sink. The ECOSHOT chemical dosing system can be set up to deliver any measure of concentrates between 5ml and 30ml and can draw chemical from any sized container.

ECOSHOT comes with a hanging bracket to support up to 10L containers or a multipurpose chemical cabinet to safely lock in chemicals. The cabinet can hold 1.5L pouches or 2L bottles to suit filling line preferences. The pouch system offers exclusivity thanks to the optional pin positions.

**3 VERSIONS AVAILABLE:** Spray bottle, Sink and Bucket

### Features

Simple push operation, with optional safety features

Unlimited adjustable dosage between 5ml and 30ml

Lock-in cabinet for both pouch and bottle

Exclusivity option for pouch system

Unit and cabinet rings available in various colours
